Congo Blue Dot : Central Africa

Gravity Map from Nasa show us Anomalies in the Earth's Gravito Magnetic Sphere. The blue represents less gravity. These blue spots can be seen in oceans where less mass creates less gravity. There could be a hole one mile deep in the Earth, or more likely there is something under the surface. The Old Faithful spring on the continental USA has a red dot due to water pressure. It erupts routinely to release dense water build up. **nasaviz.gsfc.nasa.gov/11234**

Mythical Atlantis City Allegedly Discovered in Sahara Desert

This 25km wide ditch in the Earth south from Morocco is what most idiots think caused the dinosaur extinction. While no evidence can be found that a meteorite impacted the area, it is suggested that it can be explained so long as someone thought it could somehow be important.

Blitzkrieg was About Timing : Hitler soon a target to Assasination

When most wars break out. People pillage and destroy an area. The nazis moved past switzerland, untouched. Past france, leaving it unscathed. Through the straights to gibraltar to barrel down in Africa. Hitler then succumbed to espionage an infiltration by elite troops and turned on his greatest allies. His top generals then plotted to assassinate him.

Penicillin Chelates Copper and Virus Myths

It is used as a chelating agent: In Wilson's disease, a rare genetic disorder of copper metabolism, penicillamine treatment relies on its binding to accumulated copper and elimination through urine. The ancient world is filled with people living to extremely long age. Penny in your loafers. Virus are dead things. They are harmless. **en.wikipedia.org/wiki/Longevity_myths**

Before the World Wars : Longevity : Blue Zones

Around 1912, the *Maharishi of Kailas* was said by missionary Sadhu Sundar Singh to be an over-300-year-old Christian hermit in a Himalayan mountain cave with whom he spent some time in deep fellowship. Singh said the Maharishi was born in Alexandria, Egypt, and baptized by the nephew of St. Francis Xavier. There is still resistance where people are living well past 100 years across the world. Japan, Italy, California and Greece.

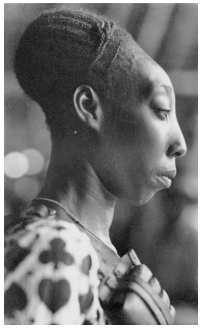
Egypts Amarna Period : King Tut

Egypt fell to South Africa. Neferttiti and Attenkamen watched as thier priests were stripped from power. The valley to the Kings was robbed and nothing was left behind. These people with long skulls out the back from thier heads are unique in antiquity. They aren't cobras. They aren't people who restored longevity to Africa. They are the people who destroyed it and fled to America where blacks and whites fought horrible wars against each other. King Tut was held slave and suffered horrible disease. It is questionable how happy the other rulers in the area were as somewhere deep in Africa a weak and petty nation ruled over them like thieves.

Egypt. Once a heaven on earth, was robbed, and hell on Earth has been thier objective ever since.

The Democratic Republic : Congo : Right

Sure looks happy to me. A misshapen skull with no forehead anymore. A slave to the inner television sets. Arrested development. Elongated skulls have existed everywhere around the world for upto 50,000 years or more. Yet these from the congo are among the most misshapen and deformed to them all. It creates lambda dominance with electromagnetics. Other skulls across the earth are shapen upright, or enhanced at the somatosensory cortex and motor cortex. It is evidence that they favored zombie remote control television sets, over sensual loving and scientifically prosperous people.



Aids began in Rwanda. It then spread to other world areas in the form reminiscent to ancient plagues. Ebola is next.

Teams of them, coordinating their surveillance. Recording you. Attacking you with sonic devices. Maybe burning you with lasers. Maybe implanting grain-sized trackers inside your body. You can feel the hard bumps under your skin. You are alarmed, naturally, and turn for help to those you trust: your family and friends. Maybe law enforcement. Only they don't believe, you. They might even act like you're the problem. Like you're crazy.
